Subject: Telephone Call - Frank Fossey (Rio Algom Mining Corp) - Lisbon Mine, M370001

I received a call from Frank Fossey [(801) 686-2217] on September 14, 1999, to advise us of their plans to begin plugging 118 open drill holes on the Lisbon Mine project area. He said that Tony Gallegos had asked him to call the Division when they were ready to begin the hole plugging project.

Mr. Fossey stated that they had the bentonite clay delivered this week and that they will start plugging the holes in the next day or two. He realized Tony was out of the office until September 27th, but was fairly certain that they would still be plugging the wells when Tony returned.

I told him I wasn't sure if we could send anyone down before Tony returns, but I would keep him posted if something changed in this regard.

A COPY OF THIS MEMO WILL BE SENT TO THE MINE FILE - M/037/001.
